Elysium Protocol

Social OS for Urban Life

PROBLEM

The Dead Internet

~70% of online content is AI-generated or bots. Real people are becoming increasingly scarce.

Manipulation operates through three conditions — PeekTime eliminates all three simultaneously.

ANONYMITY

A bot, troll, and fake account are indistinguishable from a real person.
No identity — no accountability.

REPUTATION VACUUM

An inflated review is indistinguishable from an honest one.
Every opinion carries equal weight.

UNVERIFIABLE REALITY

AI-generated content and fake venues are indistinguishable from real events and places.

COORDINATED INFLUENCE SYSTEMS (*Palantir mechanics, Cambridge Analytica, Meta algorithms*) OPERATE THROUGH ALL THREE ENTRY POINTS SIMULTANEOUSLY.

Anonymity → Reputation vacuum → Narrative without fact → Manipulation of public consciousness

OTHER PLATFORMS

- Fight consequences — reactive moderation
- Remove fakes after the violation occurs
- Their profit depends on engagement — fakes work in their favor

PEEKTIME

- Eliminates the environment — preventive architecture
- Manipulation is prevented, not removed after the fact
- Our profit depends on authenticity

They treat symptoms. We eliminate the cause.

PeekTime closes every attack vector at the architectural level

① ANONYMITY

Without a identity, there is no accountability. A bot and a human are indistinguishable.

USER VERIFICATION

PeekTime confirms you are a human, not a bot. No passports. No surveillance. You control what others see about you.

Privacy by default

② ABSENCE OF REPUTATION

Every opinion carries equal weight. An inflated review is indistinguishable from an honest one.

CUMULATIVE REPUTATION

Built from real visits and genuine interactions — on-chain, tamper-proof.

No incentive to lie

③ REALITY IS NOT VERIFIABLE

Content exists without context. Without an anchor to the physical world, AI-generated material becomes indistinguishable from reality — and trust collapses.

PROOF-OF-REALITY & PROOF-OF-TRUST

Leisure venue + timestamp + verified participation. Every interaction is anchored to the physical world and validated by **Elysium Reputational Protocol**.

Reality and trust are verifiable

Most platforms fight consequences. PeekTime architects an environment where manipulation becomes meaningless.

Our answer

PeekTime — the platform of authentic social life. The Social OS on which urban community trust is built.

PEOPLE OVER ALGORITHMS

PeekTime does not model personalities or exploit behavior. The user is a subject — not a targeting profile.

FACTS OVER INTERPRETATION

The platform captures verifiable facts of participation, action, and trust. Reputation is built from real events — not likes.

TRUST OVER ATTENTION

Not *"we know everything about you"* — but *"you know exactly why people trust you."*
Reputation is on-chain — sovereign, irrevocable.

THE OLD PARADIGM

- Put locks on doors — fight consequences
- Reactive moderation — remove after the fact
- The platform owns the user's reputation

PEEKTIME: THE NEW PARADIGM

- Builds urban environments where manipulation is not profitable
- Not moderation — a social OS of trust
- Reputation belongs to the user — on-chain, forever

UNIQUENESS

The Architecture of Authenticity

The only platform where manipulation is architecturally impossible

TRUST ENVIRONMENT

Not a protection tool — an environment architecture

User verification

privacy by default

Reputation built from real events

no incentive to lie

Proof-of-Reality: lifestyle venue + timestamp + verified participation

reality is verifiable

Proof-of-Trust: on-chain trust history

reputation is cross-platform

Manipulation becomes irrelevant — it never arises, it is not removed

SOCIAL ARCHITECTURE

Authenticity rating stored in a smart contract

Moderation

✓ Preventive environment — no ground for bots and fake profiles

Identity

✓ You control what others see about you — no passport, no surveillance

Reputation

✓ Built from real leisure events — verified history on-chain

Algorithm

✓ Amplifies trust, not engagement

Filtering

✓ Protection against AI-driven coordinated influence

Other platforms own your reputation. Here, it belongs to you — on-chain, forever.

What does PeekTime give back to the individual?

From passive consumer — to active participant in urban life

WITHOUT PEEKTIME

- ✗ You consume content
- ✗ You scroll through a feed
- ✗ You run into bots
- ✗ You read inflated reviews
- ✗ Your reputation belongs to the platform

WITH PEEKTIME

- ✓ You discover hobbies
- ✓ You go out into the city
- ✓ You meet real people
- ✓ You know where you won't be deceived
- ✓ Your reputation is your sovereign asset

Real People

verified

Real Places

authenticated

Real Events

urban

The Ecosystem: Three Entities

People → Places → Events — a self-reinforcing network of urban activity

PEOPLE

- › Verified identity
- › Participation and trust history
- › Cross-platform reputation
- › Interest-based communities and skills monetization

Discover places →

PLACES

- › Bars, restaurants, cafés
- › Cultural and sports venues
- › Digital venue profile
- › Venue authenticity rating

Organize events →

EVENTS

- › Concerts, parties, meetups
- › Workshops, exhibitions
- › Organization and participation
- › Online → Offline

Attract people →

Every interaction is recorded by the Elysium protocol → builds reputation → strengthens network trust

CIVILIZATIONAL FOUNDATION

Proof-of-Reality and Proof-of-Trust

PeekTime is built on Elysium — the Web3 layer of verifiable reputation and trust

INDEPENDENT CONFIRMATIONS

No single center of truth. Participation facts are verified independently by multiple ecosystem participants.

CROSS-PLATFORM REPUTATION

Reputation is portable across platforms. Trust history is not locked to a single product.

ON-CHAIN TRUST HISTORY

Immutable record of interactions. Partners can detect bots and anomalies.

TRUST ARCHITECTURE

PeekTime App

UI / UX — urban interface

Reputation API

social signals — reputation data

Elysium Protocol

smart contracts — verification logic

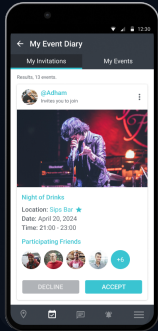

EVM Chain

immutable ledger — permanent record

DEVELOPED FEATURES

The Product Today

PeekTime (web app, beta) — tools for genuine urban life

EVENTS WITH FRIENDS

Instantly create or join gatherings — café outings, bar nights, board games, walks, sports, cultural activities.

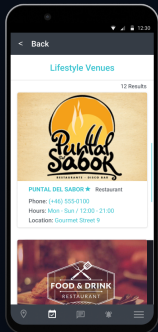

EVENT DIARY

Plan every detail in one place — chat, reminders, photos, reservations and transport request with one tap.

CITY PLACES & EVENTS

Restaurants, bars, clubs, spas, concerts, parties, workshops — filtered by taste, mood and leisure format.

LIVE VENUE FEEDBACK

Q&A from verified real visitors — feel the atmosphere, check the crowd level and service quality before you arrive.

CITY BLOG

A living urban chronicle for journalists, activists and creators — verified users rate and review venues and events.

ASK A VISITOR

Spot an interesting visitor nearby — send a brief request and, with mutual consent, a private gathering is automatically created.

A cross-border economy of urban communities — trust, authenticity, real experience.

The Next Stage of Development

PeekTime expands into a premium toolkit for urban venues

QUALITY INSIGHTS

Visitors rate dishes, service, and atmosphere. Venues receive actionable feedback for improvement.

DIGITAL TIPPING

Secure, instant tips sent directly to staff through the platform — no intermediaries, no cash.

SMART RESERVATIONS & PRIORITY ACCESS

Real-time table availability with guest preference awareness. Advance booking of high-demand spots with deposit guarantee.

SILENT SERVICE

One-tap contactless communication with staff — order, menu, payment, instant feedback. Designed for foreigners, introverts, and people with speech impairments.

QR TICKETS

Digital ticketing with attendance verification and event monetization.

MOBILE APPS

Full PeekTime functionality on iOS and Android.

Key Advantages

vs. Instagram

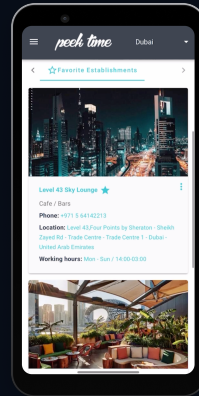

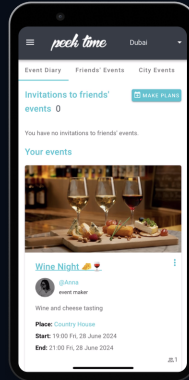

Not a feed — urban life

- ✓ Tools for creators and local leisure
- ✓ Verification eliminates bots and fake accounts
- ✓ Live signals instead of algorithms

vs. TripAdvisor

Live it, don't rate it

- ✓ Participation in the moment — not post-factum reviews
- ✓ Users create and host events
- ✓ Lifestyle as a shared urban experience

vs. Foursquare

Reputation you can trust

- ✓ Transparent reputation vs. check-ins
- ✓ Verified identity and participation history
- ✓ Rewards for venue verification

vs. TikTok

Depth over distraction

- ✓ TikTok consumes attention — PeekTime builds connections
- ✓ Cultural identity vs. trends
- ✓ Local communities, not algorithms

Price	0.0013 USDT	0.0016 USDT

Vesting

25% unlock at TGE • 75% linear over 20 months (15% every 4 months)

History & Vision

From MVP to global lifestyle infrastructure

GROWTH VISION

- Urban adoption: gatherings, bookings, taxi, delivery, event tickets — everyday urban life within a single ecosystem.
- Payment layer: fiat and crypto on-ramp for the mass user — no barriers to Web3 entry.
- International scale: global lifestyle payment gateway for urban leisure.
